WORK EXPERIENCE

Lime (IoT/Fleet Platform), Remote - Part Time Software Engineer
OCTOBER 2019 - PRESENT

- Streamlining firmware releases by automating approvals from C-level executives to operations teams via **Approval Donkey**, **Zapier**, **Active Admin** and **webhooks**
- Enhancing security by implementing authorization systems into internal tools
- Increasing visibility of operations by further enhancing the dashboards project that was created during my internship in **Vue** and **Express/Node**

Lime (IoT/Data Engineering), San Francisco - Software Engineering Intern
JUNE 2019 - SEPTEMBER 2019

- Spearheaded the SIM Theft Detection project which aimed to reduce over **$500,000** worth of damages by assessing 250,000 SIM cards.
  - Worked with **Twilio**'s team to periodically check and suspend stolen SIM cards
- Worked on the **Ruby on Rails** IoT Message processing service and was directly responsible for the development of the following features:
  - Increased Juicer retrieval rates by making the lights flash on scooters at night
  - Automatically detect and update the **MySQL** database to match changes made to the scooter in the real world (i.e. SIM card swap or motherboard swap)
  - Increased safety and reliability of scooters by improving the **OTA** firmware upgrader to make sure updates reached the scooters as soon as possible

Rakuten/Ebates (Innovation), San Mateo - Software Engineering Intern
JUNE 2018 - SEPTEMBER 2018

- Mitigated over 80% of customer support requests by implementing a **Google Cloud** hosted chat bot in **Python** (Sanic), **DialogFlow**, and **React**
- Increased advertising engagement by automatically updating Google and Facebook ads with live cashback percentages (**Marketing Engineering**)
- Onboarded more customers by building a landing page framework in **React** so that non-technical marketing people can create beautiful landing pages

Roambee, Santa Clara - Software Engineering Intern
JULY 2016 - AUGUST 2016

- Helped secure 4.1 million dollars in Series B funding by developing live demos for investors with **Node.js**, **MySQL**, and **jQuery**

Card for Coin (**FoldApp.com**), San Mateo - Software Engineering Intern
JUNE 2015 - AUGUST 2015

- Pushed out new products/providers by building scrapers in **Scala** and **Selenium**
